## Battery Powered 25 metre Ground Containment kit

## Electric Fence Systems

An extremely effective, yet safe pet deterrent system, that is unobtrusive and very flexible. Ideal for gardens, fences, ponds, aviaries and yards.

### **THUNDERBIRD Puts You In Control.**

**Control** - animals digging up your garden

**Control** - your pets from wandering off

**Control** - pets climbing or jumping over fencing

**Control** - animals around fish ponds

**Control** - unwanted visitors to your aviary

**Control** - badly behaved pets

An extremely economical system costing only a few dollars a year to operate.

This system uses a safety Certified energiser of low power design, that will not harm your pets or humans.

Thunderbird pet kits are -

**Safe** - low powered energisers deliver very safe levels of energy

**Fast, easy installation** - can be set up in under 1 hour

**Effective** - the animals respect the fence, after only a few shocks

**Quick training** - the psychological barrier teaches pets fast

**Low running costs** - mains systems cost a few dollars of electricity a year, and batteries last up to 3 months between charges

### **Trust Thunderbird with your pets**

Thunderbird is Australia's leading electric fence manufacturer, supplying systems into the Australian market for over 35 years. Thunderbird's pet systems use low energy energisers - up to 200 times less power, than systems we supply the farming market, ensuring maximum safety.

Thunderbird's pet kits have everything you need for ground barrier pet control up to 25 metres..

Other applications - such as walls, fences, fish ponds, bird aviaries etc, can also be controlled with THUNDERBIRD'S extensive product range, see your local dealer for further assistance.

### **How does the system work ?**

Thunderbird pet systems use a small, and completely safe electrical shock. similar to a static charge from a vehicle. The animal touches the live wire (this wire is totally insulated from the ground) the high voltage safe pulse travels through the animals body, back to the earth stake—when the pet receives a small shock.

Caution : Ensure adequate supervision against young children playing with fence, fence could cause harm if prolonged entanglement situations.
